POLANE

POLANE is a two-part epoxy, polyurethane enamel which has successfully withstood the most rigid testing. Spray applied, in a dust free chamber, POLANE dries to a full gloss finish. It was developed to be used whenever durability and high performance is required. The BL series may be specified in any

of the twelve colors shown below. Custom colors are also available, we will contact the factory for pricing and availability. Color choice must be specified on order (sample color may vary slightly from the actual paint color).
